All Over America the News of the
Marvelous Dandruff Cure of
Parisian Sage Has Spread.

A few years ago there was introduced into America a cure for dandruff, falling hair and all scalp diseases. News of the quick action of this wonderful invigorator spread rapidly. And today, without any sensational or untrue advertising, Parisian Sage is used extensively in almost every town in America. And what has produced this great demand? Simply this: Parisian Sage does just what we are telling the readers of The Bulletin it will do.

We claim, and we back our claim with the Lee & Osgood Co.'s money back guarantee, that Parisian Sage is the most invigorating and rejuvenating hair tonic. It cures dandruff, stops falling hair and itching scalp; it makes the hair grow strong and vigorous, yet soft and lustrous. It is the only hair dressing that reaches the root bulb of the hair and destroys the dandruff germ.

And to the women who are reading this simple statement of fact, we want to say that Parisian Sage works wonders with women's hair. It will turn dull, harsh and faded hair into beautiful, radiant and lustrous hair in a few days, and is the most pleasant and satisfying dressing any woman ever used. Druggists everywhere and The Lee & Osgood Co. sell Parisian Sage for 50c a large bottle.

The Conservation of Nature's Resources applies as well to our physical state as to material things. C. J. Budington, Washington, D. C., realized his condition and took warning before it was too late. He says: "I suffered severely from kidney trouble, the disease being hereditary in our family. I have taken four bottles of Foley's Kidney Remedy and now consider myself thoroughly cured. I am warning all not to neglect taking Foley's Kidney Remedy until it is too late." Lee & Osgood Co.

NEW WARD FOR BACKUS HOSPITAL

Contract Awarded to C. Morgan Williams and Work will be Started Soon—Will be 53x40 and Three Stories High—Finish will be Like Administration Building.

On Wednesday the contract was let by the building committee of the Backus hospital corporation for the construction of a new ward building at the south end of the administration building. There were four bidders, and the contract went to the lowest, C. Morgan Williams. Work will be started upon the new building very soon and it will be pushed to completion as fast as possible. The addition will increase the facilities of the institution greatly, adding a maternity ward and children's ward.

The same style of architecture will be carried out in the ward building as in the main structure and corridors will connect it with the administration building. The exterior walls will be water-proofed and there will be concrete footings. The ground course will be of granite and the water table will be of granite and brownstone. Red brick with granite arches and rock face granite corners as well as the floor of granite. Expanded metal laths will be used and deadening quilt will be used between the floor and about the partitions. The floor will be of slate and the side finish will be of kiln dried flat oak and American sheet glass will be used. It will be equipped with electric light and gas and the heating system of the institution extended to the addition. There will be fifteen windows on the east and west side of the building. The ward building will have a large window in the center of the two lower passages and two smaller ones for the top passage.

The ward building will set 15 feet to the south of the administration building. Included in the ward is an ell at its south end 16x28, which forms a sitting room on the ground floor. The corridor from the administration building will lead into the northeast corner of the ward building, where it turns to the west, and then goes through the center of the building. On this floor there are three large rooms about 12x14, with bath, linen closet and supply room. Each room has two windows and the corridor is 15x8. The sitting room has four windows and two bookcases will be built into it. In the walls between this ell and the main ward building will be large flues for ventilation.

On the second floor or children's dormitory the greater part of the floor is in one room, 19-1-2x40. There is a kitchen, bath, linen closet, and an examination room. The room in the ell is a day room.

The third floor has five rooms, there being three on the ground floor, and the ell is divided into two rooms, besides which there are a bath and diet kitchen on that floor.

There is a fire escape on the west of the corridor from the administration building. In the three bathrooms, the two on the second floor and the one on the third floor, there will be white Italian thresholds.

The addition will be one of great value to the institution in its broadening work. The plumbing and heating will be done by the Williams Brothers.
